

#### Question 5

How many times does the Quiz method print the "Mohammed Ahmed"?

```
public static void main(String[] args)
{
    String name = "Mohammed Ahmed";
    int x = name.length();
    Quiz(name, x);
}

public static void Quiz(String var, int y)
{
    for (int i=0; i<y; i--)
    {
        System.out.println(var);
    }
}
```

- ☐ One time
- ☐ 14 times
- ☒ Infinite times
- ☐ None of above

What is the output of the following code?

```
public static void main(String[] args)
{
    while(true)
    {
        int x = 2;
        Compute(x);
        Compute(x);
        break;
    }
    Compute(x);
}

public static void Compute(int x)
{
    if (x>=5)
        return;
    else
        System.out.println("Your number is " + x);
}
```

- ☐ Error
- ☒ prints " Your number is 2 ", three times
- ☐ Empty output
- ☐ Loops will execute infinitely

#### Question 7

Choose the most appropriate sentence which describes the task of the Quiz method:

```
public static void main(String[] args)
{
    String name = "Mohammed Ahmed";
    Quiz(name);
}

public static void Quiz(String var)
{
    for (int i=0; i<var.length(); i++)
    {
        System.out.println(var.charAt(i));
    }
}
```

- ☐ Quiz method prints the given string as it is.
- ☒ The quiz method splits the given string into characters, then print.
- ☐ Quiz method reverse the characters of the given string, then print.
- ☐ Quiz method split the given string into words, then print.

#### Question 8

What is the output of the following code?

```
public static void main(String[] args)
{
    while(true)
    {
        int x = 350;
        Compute(x);
        Compute(x);
        break;
    }
}

public static void Compute(int x)
{
    if (x>=5)
        return;
    else
        System.out.println("Your number is " + x);
}
```

- ☐ Error
- ☒ Empty message

### Question 1

How many times does the Quiz method print the given string?

```
public static void main(String[] args)
{
    String name = "Mohammed Ahmed";
    int x = name.length();
    Quiz(name, x);
}

public static void Quiz(String var, int y)
{
    for (int i=0; i<y; i++)
    {
        System.out.println(var);
        return;
    }
}
```

- ☒ 1 time
- ☐ 2 times
- ☐ 14 times
- ☐ None of above

### Question 3

What is the output of the following code?

```
public static void main(String[] args)
{
    while(true)
    {
        int x = 2;
        Compute(x);
        break;
    }
}

public static void Compute(int x)
{
    if (x>=5)
        return;
    else
        System.out.println("Your number is " + x);
}
```

- ☐ Error
- ☒ Your number is 2
- ☐ Empty output
- ☐ Loops will execute infinitely

### Question 2

```
public static void main(String[] args)
{
    String name = "Mohammed Ahmed";
    int x = name.length();
    Quiz(name, x);
}

public static void Quiz(String var, int y)
{
    for (int i=0; i<y; i++)
    {
        System.out.println(var);
    }
}
```

Choose the most appropriate sentence which describes the task of the Quiz method:

- ☐ Quiz method prints the string as the words count of the given string (two times in this case)
- ☒ Quiz method prints the string the same number as the characters count of the given string (14 times in this case)
- ☐ Quiz method only prints the counts (printing numbers from 0 to 13 in this case)
- ☐ None of the above

What is the output of the following code?

```
public static void main(String[] args)
{
    while(true)
    {
        int x = 350;
        Compute(x);
        Compute(x);
        break;
    }
}

public static void Compute(int x)
{
    if (x>=5)
    {
        System.out.println("The value of x is " + x);
        return;
    }
    else
        System.out.println("Your number is " + x);
}
```

- ☐ Error
- ☐ Empty message
- ☒ prints " The value of x is 350 ", two times
- ☐ Loops will execute infinitely
